Hi Imbi,

We hope you are doing well.

We are T16-5 Workbench elves, the student team assigned to the Writing Workbench project this semester. We're looking forward to working with you.

We have been reviewing the project documentation and the existing GitHub repository from the previous team. Before we begin planning our work, we would like to confirm the current project's scope and priorities.

We were wondering if you could let us know:

- Whether the existing user stories still reflect your current requirements.
- Which features or functionalities are the highest priority for you, so that we can focus on delivering the most valuable outcome this semester.
- Whether there are any new features or improvements that you would like us to focus on.
- Whether you have a preferred platform for the project (e.g., a desktop application or a web-based application), or if either approach would be suitable.

Your feedback will help us better understand your expectations and plan the project accordingly.

Thank you for your time, and we look forward to working with you.

Kind regards,

Workbench Elves
COMP30022 Software Modelling and Design

Dear Angelina and fellow elves,

I'm so sorry it has taken me a week to get back to you. I was on holiday and then my return to work was very busy!

In answer to your questions:

1. Do the existing user stories still reflect my requirements?

Mostly! The existing stories cover project management, structures, chapters, acts and story beats, which are all important components of the application.

The primary goal of the tool is to help authors take an existing story structure (for example, "Save the Cat"), enter a target word count and average chapter length, and then automatically map that structure onto a projected chapter plan.

2. Highest-priority features

Here are my priorities:

- Create a project with a target word count and average chapter length.
- Select a story structure template.
- Automatically calculate:
  - number of chapters
  - where acts begin and end
  - which chapters the story beats fall into
- Display chapters, acts and beats together in a visual timeline.
- Allow notes or summaries to be added to each chapter.

3. New features or improvements

Here are some suggestions:

- Automatic recalculation if the word count or chapter length changes.
- Ability to create and save custom story structures.
- Notes attached to chapters and story beats.

4. Preferred platform

My preference would be a web application because it is platform-independent and easier to access, but either a web or desktop application would also be fine.

I am a Mac user, and tend to use Google Chrome.

Additional context
I've attached an example spreadsheet that demonstrates how I currently try to plot my novels against the 'Save the Cat' three-act structure.

From a technical perspective, a structure is essentially a collection of named story "beats" positioned at specific percentage points of a manuscript. The application's value comes from converting those percentages into chapter locations based on an author's target word count and average chapter length.

For an explanation of "Save the Cat" and how story beats fit within a three-act structure, this might help:
https://blog.reedsy.com/guide/story-structure/save-the-cat-beat-sheet/

Let me know if you need any further information or you would like me to come to one of your project meetings to answer questions!

Best wishes,

Imbi

Hi Angelina,

I'm on campus Monday, Tuesday and Wednesday next week, and working from home on Thursday.

I can do the following online or in-person:
Monday 10am - 5pm
Tuesday: before 12 noon or after 3pm
Wednesday between 10am - 1pm

I can also do Thursday online 10 am - 1pm or after 3pm.

Best wishes,

Imbi

Hi Imbi,

Thank you for letting us know your availability.

Wednesday at 10:30am would work well for us. Would that time suit you?

We would be happy to meet in person if that works for you. Would Melbourne Connect be a convenient location?

Best wishes,
Angelina

Hi Angelina,

Great! I've booked meeting room 5101 in Melbourne Connect for 10:30am. I've sent you a calendar invite, but here's the location as well: https://go.unimelb.edu.au/7gh2

Looking forward to meeting you and the rest of the elves on Wednesday!

Best wishes,

Imbi

Hi Imbi,

Thank you for organising the meeting and sending through the calendar invite and location details.

Just a quick check — I believe we agreed on Wednesday at 10:30am, but the calendar invitation I received shows Tuesday, 18 August from 10:30–11:30am. Could you please confirm if the calendar invite was sent with the incorrect date?

We're looking forward to meeting you on Wednesday — the elves are excited to get started!

Best wishes,
Angelina

Whoops! Sorry about that. I've updated the invitation and resent it.

Best wishes,

Imbi

Got it, thank you!

Looking forward to seeing you on Wednesday!

Best wishes,
Angelina
