Author's Workbench MoSCoW					
Epic	**US ID**	**As a <role>**	**I want to <do something> (sub-story)**	**Priority**	**Story**
Epic 1: Project Creation and Navigation	1	User	Create a Writing Project	Must	As a user, I want to create a writing project with a target word count and average chapter length, so that the application has the information required to generate a projected chapter plan.
	2	User	View the Project Overview	Should	As a user, I want to view the current project's planning settings and selected story structure in one overview, so that I can understand the project's current configuration before continuing my planning work.
	3	User	Update Project Planning Settings	Should	As a user, I want to update the target word count and average chapter length after creating a project, so that the project settings can reflect changes to my writing goals.
	4	User	Navigate Between Core Project Areas	Must	As a user, I want to move between the project setup, story structure, projected chapter plan and notes while remaining in the same project, so that I can complete different planning activities without losing my current project context.
Epic 2: Story Structure Templates and Automatic Chapter Mapping	5	User	Select a Story Structure Template	Must	As a user, I want to select either a system-provided story structure template or my custom template, so that I can plan my manuscript by using the suitable story structure
	6	User	Calculate the Projected Number of Chapters	Must	As a user, I want the application to calculate the projected number of chapters from my target word count and average chapter length, so that I can understand the expected size of my manuscript before planning individual chapters.
	7	User	Map Act Boundaries to Projected Chapters	Must	As a user, I want the application to calculate where each act begins and ends within the projected chapter plan, so that I can see how the selected story structure divides my manuscript.
	8	User	Map Story Beats to Projected Chapters	Must	As a user, I want the application to convert each story beat's percentage position into a projected chapter position, so that I can see approximately where each important structural moment should occur in my manuscript.
	9	User	Recalculate the Projected Plan	Must	As a user, I want the projected chapter count, act boundaries and story-beat positions to be recalculated when I change the target word count or average chapter length, so that the plan remains consistent with my latest project settings.
	10	User	Create and Save a Custom Story Structure	Should	As a user, I want to create and save a custom story structure containing named acts and story beats at defined percentage positions, so that I can reuse my own planning method in future writing projects.
	11	User	Manually Adjust the Generated Plan	Could	As a user, I want to manually adjust the projected chapter position of an act boundary or story beat after the plan has been generated, so that I can adapt the selected structure to the specific needs of my manuscript.
	12	User	Create a Character	Must	As a user, I want to create a character with a name and basic profile information, so that I can identify and track that character throughout my story plan.
	13	User	View All Project Characters	Should	As a user, I want to view all characters saved in the current project, so that I can quickly select the character I want to inspect or update.

Epic 3: Character Profiles and Management	14	User	View a Character Profile	Should	As a user, I want to view a character's profile, including their recorded details and available links to story content, so that I can understand the character's information in one place.
	15	User	Edit Character Information	Must	As a user, I want to edit a character's recorded information, so that the character profile remains accurate when my story plan changes.
	16	User	Delete a Character	Should	As a user, I want to remove a character I no longer need from the project, so that obsolete character information does not remain in my story plan.
	17	User	Find and Organise Characters	Could	As a user, I want to search for characters by name and sort the character list, so that I can find a character efficiently when the project contains many characters.
	18	User	Record Additional and Custom Character Details	Could	As a user, I want to record additional details and custom fields in a character profile, so that I can store character information that is important to my particular story.
	19	User	Add a Character Image	Could	As a user, I want to add an optional reference image to a character profile, so that I can recognise the character visually.
Epic 4: Character Age Tracking	20	User	Record a Character's Date of Birth	Must	As a user, I want to record a character's date of birth, so that the application has the information required to calculate the character's age at dated story events.
	21	User	Calculate a Character's Age at an Event	Must	As a user, I want the application to calculate a character's age from their date of birth and the date of a linked story event, so that I can check how old the character is when that event occurs.
	22	User	View Character Ages Across the Story	Should	As a user, I want to view a character's calculated age at their dated events and milestones in chronological order, so that I can follow the character's age progression throughout the story.
	23	User	Record Approximate Birth Information	Could	As a user, I want to record an approximate birth year or age range when an exact date of birth is unknown, so that I can still document uncertain character age information without presenting it as exact.
Epic 5: Visual Chapter Plan and Notes	24	User	View the Visual Chapter Plan	Must	As a user, I want to view projected chapters, acts and story beats together in a visual plan, so that I can understand how the selected story structure maps onto my manuscript.
	25	User	Open an Item from the Visual Plan	Should	As a user, I want to select a chapter, act or story beat in the visual plan and open its available details, so that I can inspect or update the selected item without searching elsewhere.
	26	User	Add Notes to a Chapter	Must	As a user, I want to add and edit notes or a summary for each projected chapter, so that I can record what I plan to write in that chapter.
	27	User	Add Notes to a Story Beat	Should	As a user, I want to add and edit notes for a story beat, so that I can record how that structural moment will be represented in my manuscript.

Epic 6: Character Locations, Events and Milestones	28	User	Record a Character's Location	Should	As a user, I want to record a character's location at a dated event, scene or story moment, so that I can track where the character is during the story.
	29	User	Record a Character's Location Period	Could	As a user, I want to record the period during which a character remains at a location, so that I can represent their location over time rather than only at individual events.
	30	User	View and Correct Location History	Should	As a user, I want to view a character's location records in chronological order and correct inaccurate records, so that I can maintain an accurate history of the character's movements.
	31	User	Create a Story Event or Milestone	Should	As a user, I want to create a story event or character milestone with its core details, so that I can record an important development in the story.
	32	User	View and Manage a Story Event	Should	As a user, I want to view, edit and remove a story event, so that the event information remains accurate when my story plan changes.
	33	User	Link Characters to an Event	Should	As a user, I want to link one or more characters to a story event, so that I can record who participates in or is affected by that event.
	34	User	Link an Event to the Story Structure	Should	As a user, I want to link an event to an act, chapter or story beat, so that I can see where the event appears in the planned manuscript.
	35	User	View a Character's Story Journey	Should	As a user, I want to view all events and milestones linked to a selected character in chronological order, so that I can review the character's journey throughout the story.
	36	User	Categorise Events	Could	As a user, I want to assign a category to an event, so that I can distinguish between different types of story developments and milestones.
	37	User	Record a Character's Role in an Event	Could	As a user, I want to record each linked character's role in an event, so that I can understand how each character participates in or is affected by it.
	38	User	Record Character Relationships	Could	As a user, I want to record relationships between characters and how those relationships change, so that I can follow their development throughout the story.
Epic 7: Chronological Timeline and	39	User	View a Chronological Story Timeline	Should	As a user, I want to view dated story events and character milestones in chronological order, so that I can understand the sequence in which events occur in the story world.
	40	User	Compare Story Time and Manuscript Order	Could	As a user, I want to compare the chronological order of events with the chapters in which they are presented, so that I can understand differences between story time and manuscript order.
	41	User	View Character Ages and Locations on the Timeline	Should	As a user, I want to view each linked character's calculated age and recorded location at an event, so that I can review the character's situation at that point in the story.

Continuity	42	User	Filter Timeline Information	Could	As a user, I want to filter the timeline by character, event category or chapter, so that I can focus on information relevant to my current planning task.
	43	User	Open Related Content from the Timeline	Could	As a user, I want to select an item on the timeline and open its details, so that I can inspect or update it without searching elsewhere.
	44	User	Reposition an Event on the Timeline	Could	As a user, I want to reposition an event on the timeline, so that I can efficiently adjust its chronological position in the story.
Epic 8: Saving, Data Safety and Project Portability	45	User	Automatically Save Project Changes	Must	As a user, I want all changes to my project information to be automatically saved in the browser's database on my current device, so that I do not lose my planning work while using the application.
	46	User	Reopen a Saved Project	Must	As a user, I want to reopen a saved project with its planning information restored inside the workbencg, so that I can continue working from where I stopped.
	47	User	Display the Save Status	Must	As a user, I want to see whether my latest changes are being saved, have been saved locally, or could not be saved, so that I understand the current safety of my work.
	48	User	Warn About Unsaved Changes	Should	As a user, I want to be warned before leaving when changes have not been saved, so that I can avoid losing my work.
	49	User	Back Up and Restore a Project	Should	As a user, I want to export and import a complete project backup from local, so that I can recover my work or manually move it to another device.
Epic 9: Export and Cross-platform Access	50	User	Export the Story Plan to Microsoft Excel	Must	As a user, I want to export my chapter plan, story structure and notes as an Microsoft Excel file, so that I can review or continue developing the plan outside the application.
	51	User	Use the Web Application Across Supported Platforms	Must	As a user, I want to use the application through supported web browsers on macOS, Windows, iOS and iPadOS, so that I can create, import and edit locally stored projects without being limited to one operating system.
Epic 10: Application Extensions	52	User	Add a Project Image or Book Cover	Could	As a user, I want to add an optional image or book cover to a project, so that I can recognise the project visually.
	53	User	Create an Author Wiki Page	Could	As a user, I want to publish an author wiki page, so that I can share information about myself and my books.
