Team Internal Communication

Communication Methods

Team Author's Elves uses these methods to communicate:

Methods	Benefits	Disadvantages
Slack	• The group chat allows members to share progress, questions and blockers between meetings and respond when convenient. • Chat history keeps previous discussions, links and decisions accessible, helping all members stay aligned with the team's progress.	• Requires a longer waiting time when no team member is available. • Team members may not realise the message.
Zoom Meeting	• Voice and video make discussions clearer and more direct. • Screen sharing helps present designs, code, and technical ideas. • Questions can be answered immediately. • Meetings can be recorded or documented for later review.	• A time must be arranged when most members are available. • The meeting can easily go silent if it is not facilitated efficiently.
In-person Meeting	• Direct and effective for team discussions. • Easy to get immediate feedback and make decisions. • Suitable for collaborative activities such as pair coding and reviewing designs.	• Requires everyone to be in the same place. • May involve travel time. • Discussions are harder to review unless notes are taken. • Can be inefficient for short or simple updates.

Meetings

Both weekly supervisor meetings and team stand-up meetings will be held on Monday during the workshop activity. Client meetings will be held on Wednesday at 10:00 at Melbourne Connect. Weekly team sprint meetings will be held on Thursday or Friday at Baillieu Library or Law Building.
